

INTRODUCTION

The AA51880 is a BJT integrated circuit for use in servo motor control applications. The built-in voltage regulator provides the AA51880 with extremely stable output voltage.

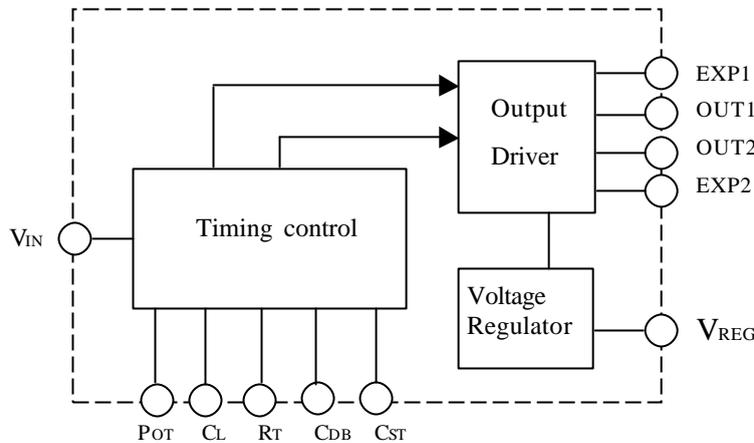

FEATURES

- Built-in voltage regulator.
- Larger driving capability.
- Small outline package.

APPLICATIONS

- Servo motor control.
- Radio controlled car, boat, airplane.
- IA products (such as air-condition).

BLOCK DIAGRAM

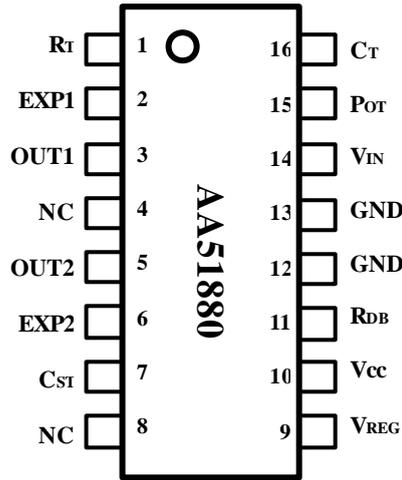

FUNCTION DESCRIPTION

- Timing control block detects the motor position and adjust dead band.
- Output driver circuit control the servo motor current direction.
- The voltage regulator supports the application reference voltage.
